PR #685	PR #539	PR #698	PR #579	PR #289	PR #693

Thesis for the pack: prioritize CLDN4 within TJ.

CPTAC LSCC: CLDN4 protein vs ImmuneScore $\rho = -0.432$ (n=78); TJ-15 protein vs ImmuneScore $\rho = -0.082$ (n=108, $p=0.40$).
No new analysis. Numbers locked from the cited PRs. Private 8-KL / KD co-culture are out of this public pack.
