

CLDN4-high malignant → barrier/exclusion family is higher on both receivers

Source PR 579 · [methods/liana_consensus_concordant4_cldn4/results/tables/family_tests.tsv](#) · n=64 units.

Consensus barrier hits include NECTIN2-CD96/TIGIT, CDH1-integrin, F11R-LFA1, LGALS9-CD44/CD45, HLA-E-NKG2A. CXCL9/10/11-CXCR3 are not barrier hits. Expression LR contrast — not spatial exclusion.
