

Disease context honesty matrix — bulk vs scRNA

Green = supports slide limb · Yellow = partial · Red = reverse / no · Gray = N/A

	COLD / ICI-resistant	Tacstd2 / Cldn4 HIGH	Assay
Skoulidis 2018 (literature)	KL ORR 7.4% CD8↓ PROSPECT	not about antigen	Human lit
MSK KRAS±STK11 DCB (PR #49)	OR 0.24 / 0.38 MH≈0.36	genotype→ICI only	Human bulk
GSE137244 KL vs KP lines	IFN soft only (not the lock)	Tacstd2 +3.24 Cldn4 +5.57 MW p=0.00794	Mouse cell-line bulk
GSE179500 Lkb1XTR	sorted tumor bulk	LKB1-off↑ padj 0.032	Mouse tumor bulk
GSE179502 scRNA	immune FACS depleted	Cldn4↓ restore Tacstd2 p=0.10	Mouse scRNA
GSE180963 scRNA	immune ~82% both; n=1	epi Tacstd2 selectivity	Mouse scRNA
TCGA-LUAD STK11	cold via lit; antigen≠cold	TACSTD2 −0.51 CLDN4 −0.47 (REVERSE)	Human bulk
GSE280232 scRNA	post-ICB T-cell rich	epi yes; genotype unpowered	Human scRNA

LOCK antigen on GSE137244 (mouse cell-line bulk). Human TCGA bulk is REVERSE for antigen. Keep bulk ≠ scRNA.
