

Part2 TJ gene screen — maximize $|\rho|$ / margin so CLDN4 wins
Do not force into Part1: TCGA fails; CosMx panel-limited; C4 not perm-separable from CLDN3/7

Concordant-4
max $|\rho|$ (CLDN4 leads)

TCGA
CLDN4 does not lead (0/60)

CosMx (CLDN3/7/OCLN/F11R OFF)
CLDN4 wins only vs CDH1 at short
